

This is in response to the NAB's petition to stop satellite radio from providing traffic and weather content. THEY MUST BE KIDDING! Satellite radio is only competitive because it provides a GREATER variety and quality not available anywhere else! That is the principle this country is built upon! I happily pay a monthly fee to receive satellite radio. As such, it should not be up to the NAB to determine what I am permitted to hear! I STRONGLY urge you, the FCC, to fully REJECT the NAB's petition 04-160 and support the fair business and ability of satellite radio to provide the kind of programming I demand and deserve.

Regards,
Cindy Nelson-Mullen
